

# Fire Sprinkler Save

Woodbury, MN

August 2<sup>nd</sup>, 2013: There was a fire in the kitchen apartment on 1<sup>st</sup> floor at the Classic at the Preserve apartments. Evidently it was started by cooking oil on the stovetop. One sidewall residential sprinkler put out the fire.

No one was injured after a grease fire caused an apartment building at the 7200 block of Guider Drive in Woodbury to be evacuated Friday night.

The [Woodbury Fire Department](#) got the call at about 9:50 p.m., said Police Sgt. Brett Billmeyer.

There was heavy smoke in at least one unit, and **sprinklers were set off in multiple apartments.**

Crews had cleared the scene by about 11 p.m. Friday, Aug. 2, working primarily to ventilate the building and clean up, Billmeyer said.

The Woodbury Fire Department is investigating.
